Artificial Intelligence Notes

Artificial Intelligence Notes

- Artificial Intelligence (AI) is a branch of computer science that focuses on creating systems capable of performing tasks that typically require human intelligence.
- Machine Learning is a subset of AI that enables systems to learn from data without being explicitly programmed.
- Deep Learning is a subset of Machine Learning based on neural networks with multiple layers.
- Natural Language Processing (NLP) enables computers to understand and generate human language.
- Retrieval-Augmented Generation (RAG) combines document retrieval with a language model to answer questions using external knowledge.
